

SAYRON D. PABILANDO

Tandang Sora, Quezon City · (+63) 994-811-0468 · sayrondpabilando@gmail.com · github.com/Sayron123

PROFILE

Computer Engineering graduate (STI College Novaliches, 2026) building toward a Full-Stack Developer career. Experienced with Python, JavaScript/TypeScript, Vue 3, FastAPI, Next.js, and MongoDB through self-directed, production-grade projects. I write clean, logic-driven code, build AI-integrated applications, and care deeply about minimalist, user-focused design. Seeking a collaborative team where I can grow in software architecture and contribute to impactful products.

WORK EXPERIENCE

Rumble Royale – QA & UI/UX Intern

February – May 2026

Quality Assurance · UI/UX Testing · Functional Testing

- Conducted functional and UI/UX testing across web application features, identifying bugs, inconsistencies, and usability issues.
- Documented test findings and communicated improvement recommendations to the development team.
- Evaluated interface behavior across different scenarios to ensure feature correctness and visual consistency.

PROJECTS

Ryuwanshoy – Comic Publishing Platform

2025 – Present

Full-Stack · Next.js 15 · TypeScript · Supabase · Cloudflare R2 · Tailwind CSS · shadcn/ui

- Production-grade web platform for a Filipino comic creator handles series management, chapter reader, and admin content publishing.
- Built a vertical scroll reader (max 800px) and a flip-page mode using react-pageflip; localStorage-based bookmark system for reading progress.
- Implemented a 3-step series creation wizard with Supabase Postgres as the database layer and Cloudflare R2 for all image/asset storage.
- Designed admin-controlled hero banners and an Early Access feature toggle via environment variable, with RLS-enforced access control throughout.
- Type-safe API routes in Next.js App Router with JWT-based Supabase Auth; strict TypeScript applied across all components and route handlers.
- Established a custom design system using Tailwind CSS and shadcn/ui to ensure visual consistency site-wide.

StuB – AI-Powered Study Buddy App

2025 – Present

Full-Stack · FastAPI · Vue 3 · MongoDB Atlas · Gemini API · Tailwind CSS · JWT Auth

- Full-stack web application for Filipino students featuring AI-driven Q&A, flashcard generation, quiz creation, and persistent study session management.
- Built a REST API with FastAPI and JWT authentication (bcrypt); integrated the Gemini API for context-aware, source-scoped AI study responses.
- Designed the Vue 3 frontend with a full dark-mode system, composable-based architecture, and a custom Tailwind design system using Material Design 3 color tokens.
- Implemented a library upload feature where students can upload learning materials and chat with the AI scoped to that specific document.
- Managed data persistence with MongoDB Atlas; structured schemas for users, sessions, AI-generated flashcards/quizzes, and uploaded library sources.
- Refactored sidebar into a reusable SidebarItems.vue component; Pinia state management integrated for JWT session and auth flow handling.

Guardner – Automated Smart Garden (Thesis)

2024 – 2025

IoT · Mobile App · Sensors · Embedded Systems · System Architecture

- Designed and sole-authored an IoT system for automated garden management: watering, fertilizer dispensing, insecticide control, and pH level monitoring.
- Built a mobile app interface for real-time remote monitoring and control of all garden sensors and actuators.
- Thesis covers full system architecture, hardware integration design, sensor calibration logic, and the mobile interface specification.

TECHNICAL SKILLS

Languages & Frameworks - Python · TypeScript · JavaScript · Java · Vue 3 · FastAPI · Next.js 15 · React

Frontend - HTML5 · CSS3 · Tailwind CSS · shadcn/ui · Pinia · Vue Router · Framer Motion

Backend & Databases - FastAPI · Next.js App Router · REST APIs · JWT Auth · Supabase (Postgres + Auth) · MongoDB Atlas · Firebase

Cloud & Storage - Cloudflare R2 · Cloudflare Pages · Cloudflare Registrar

AI Tools - Claude (Anthropic) · Gemini · Stitch · Ollama

Tools & Workflow - Git · GitHub · Docker · VS Code · Figma

Languages - English (Professional) · Filipino (Native)

EDUCATION

Bachelor of Science in Computer Engineering 2022 – 2026

STI College Novaliches, Quezon City

- Thesis: Guardner – Automated Smart Garden with mobile app monitoring for watering, fertilizer, insecticide, and pH levels.

CERTIFICATIONS

- Cloud Technical Series: AI in Action — Google Cloud APAC (2026)
- Cybersecurity Fundamentals: Understanding the Risk and Building Effective Defenses (2025)
- Next-Gen Tech Talks: IoT Application and Data-Driven Governance (2025)
- Foundations of PHP Web Development: From Web Systems to Server-Side Scripting (2026)
